

**Mr. Chain**

**2012 Price List**

## About Our Company

M R Products (Trade name is Mr. Chain) was incorporated on May 16, 1960 by Michael T. Russo. Mr. Russo was an engineering student at Ohio State University in 1941 when Pearl Harbor was attacked. He left school to join the United States Army Air Corps and returned home from the war a hero, the first Ace flying the A-36 Mustang and the P-51 Mustang.

After the War, he started his own plastics injection molding business, specializing in automotive products for General Motors and Chrysler. Eventually, Mr. Russo secured over 20 patents for proprietary products, including the process for producing plastic chain in continuous lengths.

“Mr. Chain” began to produce plastic chain and its accessories in 1970.

Since 1987, M R Products has focused solely on developing and manufacturing proprietary products. Today, the Company performs both injection molding and extrusion of plastic products. Mr. Chain has more sizes (9), styles (3) and colors (18) of plastic chain than anyone. In addition, there are four sizes of stanchions available in six colors, and a huge assortment of accessories, all for the crowd control and safety markets.

In 2006 Michael Russo passed away, leaving his company and his legacy to his family.

The Company is now a certified WBE (women-owned business), a small business, and holds a certificate as a federal HUBZone (historically underutilized business zone). All Company products are listed on federal GSA schedule 78. All our products are proprietary and made in our own factory in the Village of Copemish, Michigan. We employ 30 people, and, in 2012, we are celebrating our 52nd Anniversary.
